June 26, 2019

The Honorable Richard Neal Chairman House Ways & Means Committee U.S. House of Representatives 1102 Longworth House Office Building Washington D.C. 20515 The Honorable Kevin Brady Ranking Member House Ways & Means Committee U.S. House of Representatives 1139 Longworth House Office Building Washington D.C. 20515

Dear Chairman Neal and Ranking Member Brady:

On behalf of the organizations below, we write to express our support for the Opioid Workforce Act of 2019 (H.R. 3414). This thoughtful, bipartisan legislation would provide Medicare support for an additional 1,000 graduate medical education (GME) positions over five years in hospitals that have, or are in the process of establishing, accredited residency programs in addiction medicine, addiction psychiatry, or pain medicine. We greatly appreciate the Committee's commitment to advancing policies that would strengthen the health care workforce serving on the front lines of the nation's opioid epidemic.

According to the Substance Abuse and Mental Health Services Administration, in 2016 approximately 21 million people needed treatment for a substance abuse disorder, however only 11% of those received any treatment at all. Part of the reason for this disparity is a shortage of physicians trained in addiction medicine, addiction psychiatry, or pain management. The lack of physicians trained in these specialties reflects the nation's larger physician shortages. Funding new, targeted residency positions will strengthen the health care workforce and help mitigate the effects of the overall physician shortage.

The Opioid Workforce Act of 2019 is a targeted and important step that Congress must take to help ensure a robust physician workforce that can deliver high-quality care to those suffering from substance abuse disorders.

We encourage all members of the Committee to support this bipartisan bill.

Sincerely,
